

ZBI FMS — Factory Management System that changes the rules

Introduction: When simplicity becomes power

In a world where software often complicates instead of simplifying, **ZenBox Infinity FMS** (Factory Management System) was built from the opposite idea — to make **precision, control, and analytics accessible to everyone**, without technical barriers or long training.

ZBI FMS unites **production, finance, inventory, and analytics into one fast, intuitive interface**.

Developed through years of experience in finance and controlling within manufacturing environments, it brings professional-grade capabilities to users of all skill levels.

Key Functionalities

1 Accounting Tab — the heart of finance and controlling

- Full overview of financial entries and transactions.
- Built-in controlling reports, KPIs, and automated calculations.
- Visualization of liquidity, margins, expenses, and working capital.
- FIFO methodology ensures accurate consumption and stock tracking.

Even users with no accounting background can manage finances precisely and confidently.

2 Work Orders & Production Planning

- Create, track, and manage work orders in real time.
- Overview of planned vs completed production.
- Capacity utilization analysis per line and order.
- Automated productivity and cost insights.

All in one place — planning, execution, and analytics — without unnecessary complexity.

3 Finance & Cash Flow

- Complete overview of cash inflows and outflows.

- Visual tracking of liquidity and current solvency status.
- Quick analysis of liabilities vs receivables.

ZBI FMS provides an **instant snapshot of company health**, enabling smarter financial decisions based on accurate data.

Inventory Management

- FIFO-driven accuracy in stock tracking.
 - Dead stock detection for unused or slow-moving items.
 - Automatic synchronization with production and sales.
 - Real-time visibility of materials and finished goods.
-

Statistics and Controlling Indicators

- KPI dashboard with interactive visuals.
- Monthly trends, MoM analytics, and period comparisons.
- Reports covering productivity, cost efficiency, and profitability.

ZBI FMS doesn't just report data — it **builds controlling awareness** in every user.

Reliability, Security, and Ownership

- Full **data ownership and privacy** — everything is stored locally.
 - Powered by **SQLite**, ensuring speed, stability, and security.
 - **Multi-user access** via shared folders — no dedicated server required.
 - Automatic backups keep data safe and consistent.
 - **Hardware-based licensing** ensures reliability and full user control — with no monthly fees.
-

In Practice

ZBI FMS is designed to deliver professional-level control and analytics — even for users without technical experience.

A few hours of short, guided onboarding or following the in-app tutorial is enough to start managing production, finances, and analysis like a professional.

Minimal time — maximum results.

Why ZBI FMS?

- Combines manufacturing, finance, and controlling in one system.
 - Interface that guides the user instead of confusing them.
 - Professional insights without consultants or cloud costs.
 - Works perfectly offline.
 - True analytical depth, accessible to everyone.
